

About Kaffa

We are a provider of Mobile Enterprise Geospatial solutions for the utilities industry with an emphasis in the energy distribution and transmission segments. Our company has delivered many Mobile GIS solutions built with our innovative Espresso Platform, fully integrated with corporate GIS (ArcGIS and SmallWorld), ERP (SAP) and other vertical systems.

Espresso Platform let companies design, construct, maintain and manage networked assets in the field with powerful features normally not available in mobile applications.

Customers

Using Espresso, our clients are improving their operational efficiency not just by automating processes, but also for being assisted by a platform that provides many additional benefits like full network and input validation and assistance combined with an easy to use interface.

Within our clients are companies affiliated with international corporations like AES and Iberdrola. We have customers from the private and public sector.

Companies like AES Sul, Celesc, CPFL Energia and Elektro (an Iberdrola company) are among our clients.

Request a POC

A proof of concept is a great way to demonstrate Espresso's powerful features integrated with the company's GIS and data model.
